Education

University of California, Berkeley *Berkeley, CA*

B.A. in Computer Science and B.A. in Data Science *August 2019 - May 2023*

Introduction to Machine Learning · Introduction to Computer Vision and Computational Photography · Operating Systems and Systems Programming · Discrete Mathematics and Probability Theory · Great Ideas in Computer Architecture (Machine Structures) · Structure and Interpretation of Computer Programs · The Foundations of Data Science · Designing Information Devices and Systems I and II · Efficient Algorithms and Intractable Problems · Data Structures · Introduction to Artificial Intelligence · Principles and Techniques of Data Science · Computer Security · Probability and Random Processes · Data Mining and Analytics

Skills

AI & Agent Systems Model Context Protocol (MCP) · Multi-Agent Orchestration · Tool Execution · LLM Gateways · RAG · Vector Databases · Prompt Engineering · Agent Evals

Languages Python · C/C++ · TypeScript · JavaScript · Go · SQL · HTML/CSS · LaTeX

Systems & Infra Distributed Systems · REST/gRPC APIs · Microservices · AWS · Docker · Kubernetes · CI/CD · Git/GitHub

Frameworks & Tools PyTorch · React · React Native · Expo · Node.js · Supabase · PostgreSQL · Redis · Qt

Work Experience

Salesforce *San Francisco, CA*

Member of Technical Staff *Feb 2025 – Present*

- Architected an autonomous multi-agent code review framework leveraging tool-use and goal-verification loops across specialized agents (security, performance, coder), cutting manual review overhead by 300+ hours.
- Spearheaded MuleSoft's AgentForce AI Assistant using Einstein LLM Gateway and custom Model Context Protocol (MCP) servers to enable automated role provisioning via structured natural language tool execution.
- Optimized high-throughput authentication microservices by migrating to JWT tokens, reducing database queries by 90% and enhancing system resilience under heavy load.
- Led zero-downtime infrastructure migration of 7 Access Management microservices across 22 cross-functional teams to Hyperforce with 0 production incidents.
- Managed deployment and regional rollout of 6 core services to 7 global and government regions (Civilian, DoD), maintaining 99.99% service availability.
- Implemented custom secrets expiration duration feature for client provider applications within one week of joining team, boosting customer satisfaction ratings by 5%.

Associate Member of Technical Staff *Jul 2023 – Feb 2025*

- Managed Cryptography framework to ensure uptime of 99.99% for enterprise customers.
- Designed and implemented expiring certificate notification system, reducing certificate-related incidents by 40%.
- Modified metadata schema for secrets seamlessly to enable service teams to introduce critical features and enable new functionality for customers.
- Oversaw monthly releases for on-premise and cloud offerings to ensure performance regressions were detected and remediated.
- Created performance monitoring framework to make performance validations 40% quicker.
- Fixed critical bugs and improved efficiency of performance testing pipeline by 13%.

Intel *Santa Clara, CA*

Software Engineering Intern *Sep 2022 – Jul 2023*

- Engineered C++/Qt features for enterprise power management tools, supporting cross-platform and remote execution.
- Built system resource monitoring capabilities to track real-time CPU, Memory, Disk, and GPU utilization during intensive benchmark workflows.
- Refactored process monitoring architecture by capturing error streams and optimizing child process discovery, reducing codebase size by 60%.
- Resolved critical performance bugs and customer feature requests, driving an 11% improvement in CSAT metrics.

Salesforce *San Francisco, CA*

Software Engineering Intern *May 2022 – Aug 2022*

- Diagnosed frontend performance bottlenecks across core web applications using automated testing and telemetry tools.
- Optimized client-side rendering and asset loading across 5 flagship web applications, improving loading speeds by 77% on average.
- Established web performance benchmarking guidelines and CI/CD audit workflows for MuleSoft engineering teams.

Allganize *Oakland, CA*

Software Engineering / Artificial Intelligence Intern *May 2021 – Nov 2021*

- Optimized backend microservices for enterprise AI application, improving API response times, implementing features, and resolving critical bugs.
- Overhauled OCR document ingestion pipeline, cutting processing latency by 20% and increasing extraction accuracy by 12%.
- Researched and deployed a multimodal embedding model for image-text retrieval across client document stores, directly securing an enterprise contract.
